Toxicological Pathologist

Ledbury, Herefordshire

Negotiable Salary + Benefits

Sequani is seeking to recruit a toxicological (anatomic) pathologist to join our established and well respected pathology team. We can be flexible about the level of recruitment depending on qualifications and experience up to the level of Principal Pathologist. The successful candidate will already have experience of conducting the pathology slide-reading on toxicology studies with limited supervision and will at least be part way towards a recognised pathology qualification such as FRCPath, Dipl.ACVP or equivalent. Individuals with previous CRO experience are particularly sought.

Sequani is an independent CRO providing toxicology and associated services across the pharmaceutical, crop-protection and chemical safety sectors. We have built an outstanding, global reputation for scientific depth and on-time delivery that has underpinned a period of exceptional growth. This growth has continued through the lock-down and the company is predicting further growth in the short and longer-term.

You will join a small team of pathologists supporting our multidisciplinary toxicology studies with additional resource provided by external consultants as needed. You must be well organised with excellent communication and scientific writing skills and must be able to deliver work to agreed timescales with a track record of doing so. The successful candidate should be highly motivated and have the ability to work individually and in a team environment.

As a Silver Investors in People organisation we offer a varied role with a clear career progression path and excellent personal development opportunities, together with a good range of company benefits. The development of our scientists is crucial to our success and we seek and support opportunities for continued education, publication, attendance at scientific meetings and active participation in professional societies. We will seek to progress your training as a board-certified pathologist if you have not already achieved this level.

In order to apply, please visit the careers page on www.sequani.com and submit an online application. We shall look forward to hearing from you.
