

Pathology for Nonpathologists Course—Europe

July 6–8, 2015 • MedImmune, Cambridge, UK

Hosted by:
the American College of Toxicology and the
British Society of Toxicological Pathology

With support from:
Society of Toxicologic Pathology

Course Description

This three-day joint American College of Toxicology (ACT) and British Society of Toxicological Pathology (BSTP) course, modeled after the successful ACT/STP US Pathology for the Nonpathologist course, will be held for the first time in the United Kingdom in July 2015.

The knowledge gained will be immediately applicable to your day-to-day practices. The course will be suitable for toxicologists, safety pharmacologists, nonclinical regulatory scientists, and other scientists working in preclinical disciplines. The content will be suitable for those who are relatively new to their roles, and will also be highly relevant to experienced scientists who wish to consolidate their understanding, and update their knowledge of recent developments and changes in the field. Highly respected pathologists with current, relevant experience in toxicologic pathology will provide lectures covering anatomy and physiology, spontaneous and chemically induced pathological changes, clinical pathology, and case examples.

Course Organizers:

American College of Toxicology:

Patricia Ryan, MedImmune
Thomas Steinbach, Experimental Pathology
Laboratories, Inc.

British Society of Toxicological Pathology:

Silvia Guionaud, MedImmune
Vasanthi Mowat, Huntingdon Life Sciences
Matthew Saunders, Huntingdon Life Sciences
Ian Taylor, Huntingdon Life Sciences

Details for this course may be found at www.actox.org • REGISTER TODAY!

Day 1, Monday, July 6

Principles and Practices

Kenneth Schafer, Vet Path Services

Hepatobiliary System

Adam Hargreaves, PathCelerate

Day 2, Tuesday, July 7

Renal System

Kevin McDorman, Charles River

Nervous System

Alys Bradley, Charles River

Day 3, Wednesday, July 8

Cardiovascular System

Vasanthi Mowat,
Huntingdon Life Sciences and
Peter Clements, GlaxoSmithKline

Immune System

Marlon Rebelatto, MedImmune
