

The 38th Annual Scientific Meeting of the British Society of Toxicological Pathology (BSTP)

Preclinical translatability and pathology of cell-based therapies

Wednesday 15 – Thursday 16 November 2023

Hosted by Evotec in Verona, Italy

Call for Poster Abstracts

The deadline for the submission of poster abstracts will close on Friday 20th October 2023. If you would like to submit a poster abstract, please contact events@hg3.co.uk as soon as possible.

- Abstracts should be no more than 500 words in total, to include references
- Abstracts will be printed in black and white
- Please send abstract in word document to events@hg3.co.uk
- Relevant work can be retrospective analysis of data, prospective experiential work, case studies, procedural reports, methodology reports or a written description of a project. Work included in a poster does not have to have been published in a peer-reviewed journal. It is important that the abstract reflects the relevance of the work being presented to the disciplines of toxicologic pathology and mouse pathology
- Ensure that the abstract has been checked for grammar, spelling, and accuracy
- All authors should review the abstract and approve it prior to submission
- It is convenient to use subheadings in the poster, but subheadings are not required for the submitted abstract
- Subheadings include the Introduction/Objectives which lay out the rationale for the work being presented, as well as the proposed objective(s) for the work and the hypotheses being tested. It explains why the work is important and what it adds to the current body of knowledge. The Experimental Design/Methods and Materials section describes the experimental methods used and, if possible, specific numbers and details of the experimental results should be included in the abstract. The Results section can include graphs and tables of experimental results (in the poster, not abstract). The conclusion section sums up the results and gains from the work.

But why should you submit an abstract at all? Here are five reasons why you definitely should not miss the opportunity.

1. **Be awarded** – Become one of the recipients of the Best Abstract Award for presenting an outstanding abstract. As a winner, you will receive a voucher worth £100, this is also a great addition to your CV helping you stand out among other potential job candidates.
2. **Make a difference** – By sharing your work, you increase the knowledge of professionals in the fields of toxicology and pathology attending the conference.
3. **Advance your career** – Become well-known in the field by increasing your exposure for your latest findings. Submitting an abstract and holding a talk has many advantages for your scientific career: You get to improve your presentation skills and showcase your hard work at an amazing conference with your peers. Furthermore, you have the chance to advance your career by receiving useful feedback.
4. **Take it from local to global** – Take the next step from local research towards international collaboration. This is a great opportunity to hear what other people are working on, identify potential collaborators, and keep up to date.
5. **Expand your international network** – By discussing your findings with other leading experts from around the world you get to expand your international network. This is your chance to disseminate your research ideas and advertise yourself. Discussions following a talk can lead to future collaborations and giving the right talk at the right time can lead to many exciting opportunities.

We cannot wait to find out more about your work and research.
